About the University

Rashtriya Raksha University, an institution of National Importance, is a central university under the aegis of the Ministry of Home Affairs, Government of India, established by the Parliament of India through Act No. 31 of 2020 as a pioneering National Security and Police University of India. The University aims to become an academic-research-training ecosystem for national security and police. Its endeavours focus on highly professional national security, police education, research, and training through its qualified civilian and security faculty, committed human resources, motivated participants, and students, intellectually stimulating and professionally disciplined environment, and worldwide network, sharing, and exchange. It aims at providing security and strategic education in contemporary and futuristic security and strategic studies and interdisciplinary areas. The University contributes to the vision of India of Peace, Prosperous, and Stable World in alliance with grand strategic cooperation between like-minded nations and promoting greater understanding between internal security officers, military and para-military forces, diplomats, civil servants, and civilians to promote the cause of the Nation. It adopts a two-tier approach, at the national and international levels, in its education, research and training, and extension in order to achieve capabilities to respond to the needs, expectations, and aspirations of the security and strategic institutions and forces as well as law-making, governance, judiciary, economy and the civil society organizations.

About Internship and Placement Branch (I&PB)

Internship & Placement Branch (I&PB) is a facilitating body conducting training, counselling skill enhancement activities for the final placement of the young minds of the university. RRU believes in creating professionals with a sense of integrity, awareness & excellence. I&PB is enthusiastic to bridge the gap between the students and the world outside the campus to be able to chase their dreams. Apart from providing job and internship opportunities, I&P Branch also offers guidance to students that helps them shape their career to empower the students to discover their true potential and help them to pursue their dreams in all possible career verticals including entrepreneurship, placement, further study and competitive examinations. Students can avail I&P Branch resources that help them to explore and plan their career effectively. I&P Branch also conducts various sessions that help students in career counselling, resume preparation, screening tests, group discussion, interview process, personality development, interactions with Alumni where they share their journey & experience and through that inspire the budding graduates. The I&P Branch provides a platform where opportunity taker(students) and opportunity giver (recruiter) can come together to explore avenues of a fruitful and collaborative association. We are proud of several such associations in the past in the form of internships and placements for which we are grateful to participating organizations both from India and abroad.

Job Alerts

7. Company name: CrowdStrike

Job Title: Threat researcher III

Location: Remote, India

Job Description:

The Threat Analyst will take input from many sources and validate if those threats are something Falcon can mount an effective defense against. The analysis can range from simple execution and review of the behaviors to reverse engineering. As Falcon is first a behavior based system, understanding how the threat is working and what it is doing to interact with the host environment can be important. The Threat Analyst will be expected to use the appropriate technique to efficiently understand the threat to identify how to best mitigate it. The Threat Analyst will be working on creating new Sandbox signatures and help to improve Sandbox detections.

What You'll Need:

- Bachelors or Masters in Computer Science or comparable field required.
- 6+ year's experience in the threat research field with a focus on malware analysis.
- A proven background in reverse engineering on file-based threats, exploits, and other attack techniques are desirable to be demonstrated at a moderate skill level.
- A reasonable level of proficiency in disassembly. To operate at the level required to disassemble, core principles of structured programming is required
- Expert level familiarity with at least one major Operating System is required as a behavior based system requires in-depth knowledge of how the host OS appears, as opposed to how the end user sees it.
- A working knowledge of using MITRE ATT&CK to describe threat behaviors
- Experience with Malware Sandboxing technology like Cuckoo Sandbox is a plus.
